

Machine seam ceiling Katajanokka Casino | Helsinki

Description

At the customer's request, the site was coated with ElaProof H handmass as a brush work. The facade of the Casino was renovated the previous summer, and now the coating of the dome crowns the beautiful building.

Information

History of the building: A. Nyberg (1877 – 1952) is considered the designer of the original Casino building. The date of the building's completion is also somewhat unclear, but it was probably completed for the Russian officer corps in 1913. Immediately after its completion, the officer's casino held brilliant and attention-grabbing parties in true Russian fashion. In addition to dining, it was also possible to play billiards, corona and card games at the Casino.
