

Machine seam roof 950 m² | Helsinki

Description

In Eira, downtown of Helsinki, the machine-seamed tin roof of a valuable property was coated with environmentally friendly ElaProof S in accordance with the work instructions twice. The penetrations and seams were sealed with ElaProof H before installing ElaProof S.

Information

Architect: John Wikander. Completed: 1915. In the 1920s, the building could have been called the managers' house, as no less than four managers and one senior manager lived there. More information about the building can be found on: www.finna.fi
