Refurbishment of an old epoxy floor, 25 m² | Väripirtti Ltd. | Vantaa

Description

At the site, the old epoxy floor was sanded to expose the surface. Wall-floor junctions were sealed with ElaProof Indoor and ElaProof Base Fabric. The interior side of the exterior wall’s base was treated with ElaProof+SAND Wall Coating. Following these steps, the floor was coated twice with ElaProof+SAND Floor Coating (sands: medium-coarse and fine). To achieve a dynamic final finish, the customer opted for ElaProof Art&Deco ColourChips. Easy maintenance is ensured by the application of ELACOAT TopCoat.

Information
