Refurbishment of an old epoxy floor, 25 m² | Väripirtti Ltd. | Vantaa

Description

At the site, the old epoxy floor was sanded to expose the surface. Wall-floor junctions were sealed with ElaProof Indoor and ElaProof Base Fabric. The interior side of the exterior wall’s base was treated with ElaProof+SAND Wall Coating. Following these steps, the floor was coated twice with ElaProof+SAND Floor Coating (sands: medium-coarse and fine). To achieve a dynamic final finish, the customer opted for ElaProof Art&Deco ColourChips. Easy maintenance is ensured by the application of ELACOAT TopCoat.

Information

Väripirtti Ltd., located in the Kelatie industrial area in Vantaa, is a fourth-generation, construction-specialized store founded in 1954.

Project information

Client: Väripirtti Ltd
Project: Floor, plinth, and effect wall
Address: Kelatie 17, 01450 Vantaa
Material: Epoxy floor, concrete plinth, painted chipboard wall

Time and city: 02/2023 | Vantaa | Finland

Products used in the project

- ElaProof Indoor
- ElaProof Base Fabric
- ElaProof+SAND Floor Covering
- ElaProof Art&Deco Colour Chips
- ElaProof+SAND Plinth Protection
