

Felt roof 1250 m² | Lappeenranta

Arbejdserklæring

The site has an old felt roof that was coated with an environmentally friendly ElaProof coating. The isocyanate-free ElaProof S was sprayed into the site twice according to the work instructions. Before the coating work, the seams and penetrations were sealed with ElaProof H.

Mere information

LUT (Lappeenranta University of Technology) has been awarded as the best university in the Excellence in Campus category of the global Sustainable Campus Excellence Award competition. The awards were given based on actions and demonstrations that concretely promote sustainable development and green technology.
