

Plinth coating and waterproofing 52 m² | Vantaa

Arbejdserklæring

An old town house in Vantaa experienced a complete facelift when the waterproofing of the plinth was fixed with ElaProof+SAND Plinth Protección. The site has an old cast plinth and a newer ingot plinth, which was leveled before ElaProof+SAND coating. At the same time, the contractor handled the exterior painting of the house. Now the old house is like candy!
