

Roof terrace waterproofing | Espoo

Arbejdserklæring

At the this site, the waterproofing of the roof terrace and outdoor stairs was carried out with Finnish isocyanate-free ElaProof H.

Mere information

There are several detached houses in the area, where below the roof terrace the so-called cold storages. Leaks into warehouses were detected in previously built sites. In this location, the waterproofing was implemented with ElaProof. Afterwards, other houses were also fixed using a proven method. After waterproofing, wooden rails built in place from pressure-saturated wood were installed on the stairs and terrace.
